

DATABASE SYSTEMS (5330 – 005)

PROJECT PHASE – III

Project Team 10

Team Members - Ravi Prakasha (1002026832), Silpa Vijayan Geetha (1001989441)

CREATING WEB INTERFACE:

Part – 1

Web Interface Based Questions:

1. Display the customer details based on any one of the following: state name or state Ab (For example Texas or TX)

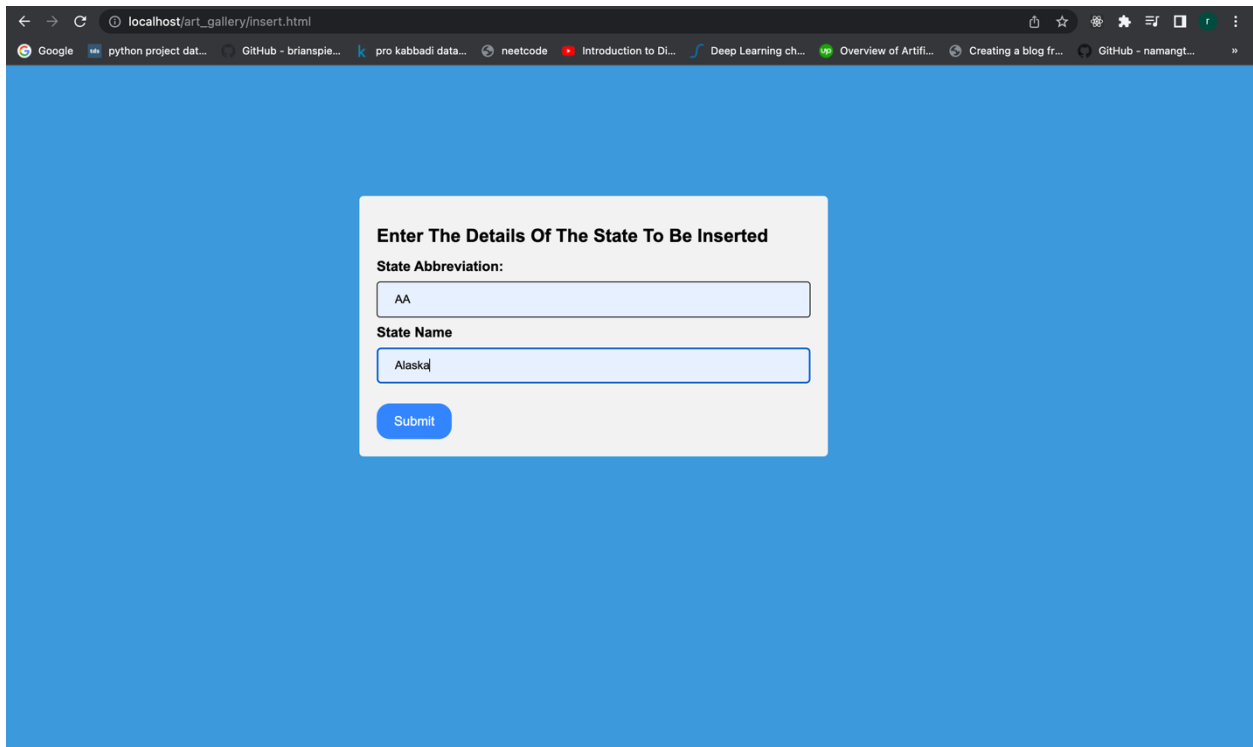

The screenshot shows a web browser window with the address bar displaying 'localhost/art_gallery/get_customer.php'. The browser's address bar and tabs are visible at the top. Below the browser window, a table displays customer details. The table has six columns: Customer Id, Customer Name, Street Address, City, State Code, and Zipcode. There are 14 rows of data, each representing a customer.

Customer Id	Customer Name	Street Address	City	State Code	Zipcode
1	Mahbod Seraji	1500 E Exchange Road	Allen	TX	75002-4504
2	Shazadi Seraji	1500 E Exchange Road	Allen	TX	75002-4504
3	Nadia Hashimi	1405 Julian Street	Addison	TX	75001-4633
4	Tahmima Anam	11200 Graceland Lane	Frisco	TX	75033-0062
5	Elena Lee	800 Preston Road	Gunter	TX	75058-0001
6	Harper Lee	800 Preston Road	Gunter	TX	75058-0001
7	Scott Green	150 Main Road	Gunter	TX	75058-0001
8	Mary Green	150 Main Road	Gunter	TX	75058-0001
9	Tom Twain	1010 Spicewood Drive	Garland	TX	75044-2569
10	Maya Morrison	2018 N Travis Street	Sherman	TX	75090-0006
11	Jay Steinbeck	1092 Old Kaufman Road	Kemp	TX	75143-0001
12	Linda Steinbeck	6400 Shortland Drive	Dallas	TX	75248-7405
13	Randy Bradbury	1200 Speed Street	Marshall	TX	75670-0001
14	Wu Ming	125 Sterling Price Street	Tatum	TX	75691-0809

2. Insert a new state 'Alaska', 'AA' in the art gallery database using the web interface you created.

```
art_gallery > add_state.php
1  <?php
2  $state_Ab = filter_input(INPUT_POST,'stateAb');
3  $state_Name = filter_input(INPUT_POST,'stateName');
4      $user = 'root';
5      $pass = '';
6      $db = 'art_gallery';
7
8      $conn = new mysqli('localhost',$user,$pass,$db) or die("not connected");
9  if($conn){
10      $data = "Insert into state values('$state_Ab','$state_Name')";
11      $result = mysqli_query($conn,$data);
12      echo "State Details is Inserted Successfully";
13
14  }
15  ?>
```

3. Update the state record that you just added to 'Alaska', 'AK' using the web interface you created.

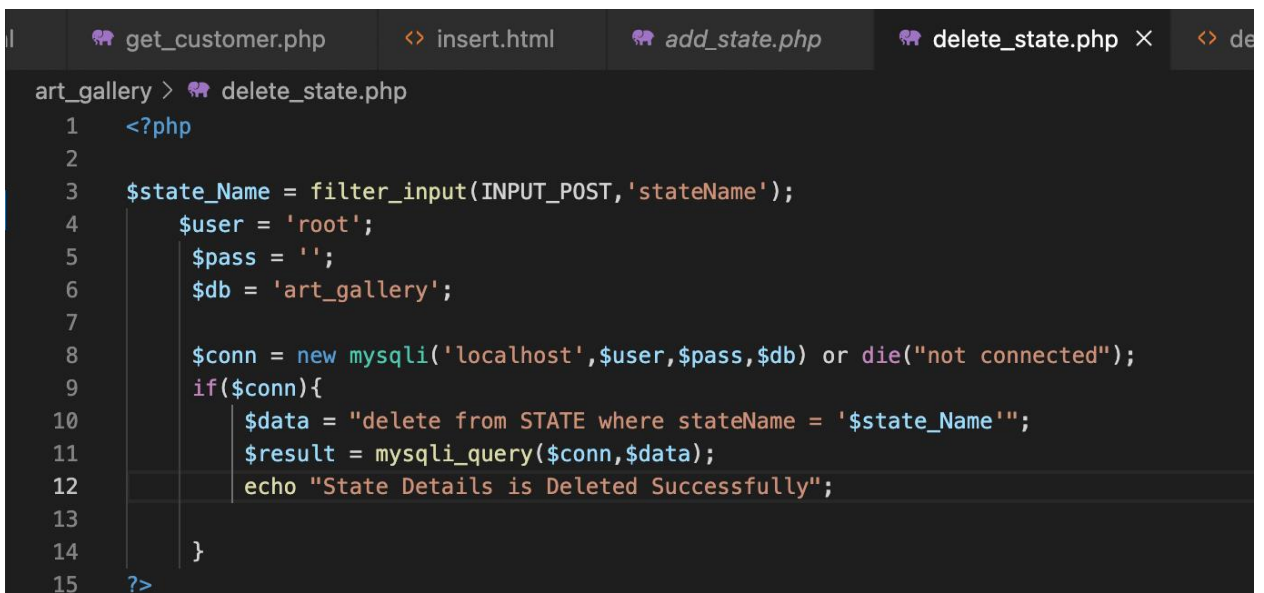

```
art_gallery > 🐞 update_state.php
1  <?php
2  $state_Ab = filter_input(INPUT_POST, 'stateAb');
3  $state_Name = filter_input(INPUT_POST, 'stateName');
4      $user = 'root';
5      $pass = '';
6      $db = 'art_gallery';
7
8      $conn = new mysqli('localhost', $user, $pass, $db) or die("not connected");
9      if($conn){
10         $data = "update STATE set StateAb = '$state_Ab' where stateName = '$state_Name'";
11         $result = mysqli_query($conn, $data);
12         echo "State Details is Updated Successfully";
13     }
14
15     ?>
16
```

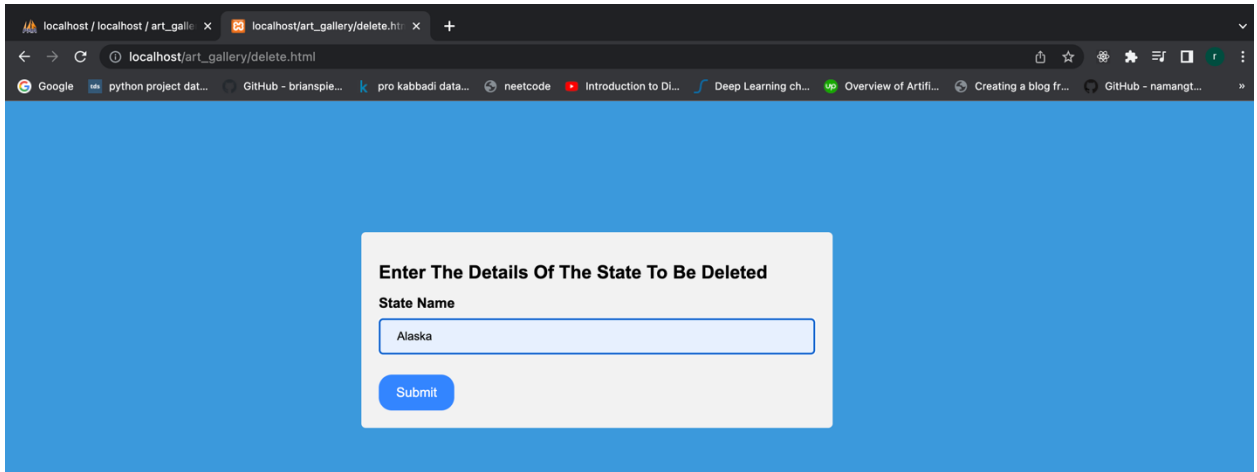

The screenshot shows a web browser window with the address bar displaying 'localhost/art_gallery/update.html'. The browser's tab bar includes several open tabs, such as 'python project dat...', 'GitHub - brianspie...', 'pro kabbadi data...', 'neetcode', 'Introduction to Di...', 'Deep Learning ch...', 'Overview of Artifi...', 'Creating a blog fr...', and 'GitHub - namangt...'. The main content area of the browser has a solid blue background. Centered on this background is a white rectangular form titled 'Enter The Details Of The State To Be Updated'. The form contains two input fields: the first is labeled 'State Abbreviation:' and contains the text 'AK'; the second is labeled 'State Name' and contains the text 'Alaska'. Below these fields is a blue 'Submit' button.

4. Delete the state of Alaska record that you just added using the web interface you created.

Part – 2

VIEW-BASED QUESTIONS:

1. Create a view ArtworkView that shows name of artist as ArtistName, his date of birth as Bdate, title of the artwork as ArtworkTitle, the form of artwork as Form, the sale date as SaleDate, the price as ArtworkPrice, the customer's name who bought the artwork as CustomerName, final date of the payment as FinalPaymentDate, and the acquisition date of that artwork as AcquisitionDate. Records should be sorted by the name of the artist.

CREATE VIEW ARTWORKVIEW

(ArtistName,Bdate,ArtworkTitle,Form,SaleDate,ArtworkPrice,CustomerName,FinalPaymentDate,AcquisitionDate)

AS

Select

a.name,a.birthDate,art.title,art.form,b.saleDate,art.price,c.name,p.final_date,art.acquisitionDate from artist a, artwork art, bought b, customer c, payments p where a.aid=art.aid and art.artID=b.artID and b.cid=c.cID and art.artID=p.artID order by a.Name;

Showing rows 0 - 21 (22 total, Query took 0.0007 seconds.)

Select * from ARTWORKVIEW;

Profiling [Edit inline] [Edit] [Explain SQL] [Create PHP code] [Refresh]

Show all | Number of rows: 25 | Filter rows: Search this table

2. Use the view Artwork View to retrieve a list of unique names of the artists and their customers when both the names start with vowels.

Select DISTINCT(ArtistName), CustomerName from ARTWORKVIEW where ArtistName REGEXP "^[aeiou].*" and CustomerName REGEXP "^[aeiou].*";

Showing rows 0 - 1 (2 total, Query took 0.0006 seconds.)

Select DISTINCT(ArtistName), CustomerName from ARTWORKVIEW where ArtistName REGEXP "^[aeiou].*" and CustomerName REGEXP "^[aeiou].*";

Profiling [Edit inline] [Edit] [Explain SQL] [Create PHP code] [Refresh]

Show all | Number of rows: 25 | Filter rows: Search this table

+ Options

ArtistName	CustomerName
Albert Bierstadt	Anil Desai
Edward Hopper	Amitav Ghosh

Show all | Number of rows: 25 | Filter rows: Search this table

3. Use the view ArtworkView to retrieve a list of unique names of the artists whose artwork form is painting.

Select DISTINCT (ArtistName) from ARTWORKVIEW where Form = 'painting' ;

The screenshot shows a database query interface. At the top, a green status bar indicates "Showing rows 0 - 5 (6 total, Query took 0.0005 seconds.)". Below this, the SQL query is displayed: `Select DISTINCT(ArtistName) from ARTWORKVIEW where Form = 'painting';`. A toolbar below the query includes a "Profiling" checkbox and links for "Edit inline", "Edit", "Explain SQL", "Create PHP code", and "Refresh". Below the toolbar, there are controls for "Show all", "Number of rows" (set to 25), and a "Filter rows" search box. The results are displayed in a table with one column, "ArtistName", containing six rows of names: Abed Abdi, Edward Hopper, Georgia O'Keeffe, Jasper Johns, Li Chen, and Nandalal Bose.

ArtistName
Abed Abdi
Edward Hopper
Georgia O'Keeffe
Jasper Johns
Li Chen
Nandalal Bose

4. Use the view ArtworkView to retrieve a list of unique names of the artists, artwork title, and the price when the price is greater than \$250.00 and less than \$15,000.00

Select DISTINCT(ArtistName), ArtworkTitle, ArtworkPrice from ARTWORKVIEW where ArtworkPrice > 250.00 and ArtworkPrice < 15000.00;

✓ Showing rows 0 - 6 (7 total, Query took 0.0006 seconds.)

```
Select DISTINCT(ArtistName), ArtworkTitle, ArtworkPrice from ARTWORKVIEW where ArtworkPrice > 250.00 and ArtworkPrice < 15000.00;
```

☐ Profiling [Edit inline] [Edit] [Explain SQL] [Create PHP code] [Refresh]

☐ Show all | Number of rows: 25 | Filter rows: Search this table

+ Options

ArtistName	ArtworkTitle	ArtworkPrice
